

Mechanical

Electrical

Plumbing

## Introduction

**Solace are an ever expanding M&E contractor, that cover a broad spectrum of sectors. We specialise in mechanical, electrical and plumbing services. We are based in London but cover the whole of the UK.**

Here at Solace, we understand that each project has its own unique challenges. This is why we approach each project individually. Using our experience from previous projects but also adapting to any new challenges that we face. We have a diverse workforce with a range of experience as well as a fantastic supply chain made up of partnering companies that we have built great relationships with.

## Communication

At Solace we understand that communication is key to a successful project and a happy client. We believe that transparency with our clients is a key reason for our success.

## Quality

We believe all projects are created equally. We strive to deliver the highest quality service on each of our projects regardless of size. We understand that a high quality product is vital to client satisfaction.

# Services

## Design

We offer design on all aspects of our work, from the client's brief at stage one to validations of stage 4 design package to take into construction.

## Installation

Our team of engineers alongside our expert supply chain will deliver a high quality installation that everyone will be proud of.

## Maintenance

Let us help you to maintain your existing installations to ensure and improve their efficiency, performance and safety.

## Testing & Commissioning

We fully test & commission our installations and provide a full range of detailed condition reporting and periodic testing on existing systems.

## Health & Safety

Respect for everyone's safety and wellbeing. From client to onsite personnel to members of the public.

## What we do
